Quonset Building- 30' x 64' -1961

Basement: treated lumber was all a .60 wolmanized treatment, the footings were washed rock 12" to 16", the studs were 12" on center, plywood was caulked between all the seams, exterior of walls was coated with foundation coating and covered with 6 mil plastic, drain tile was placed at the footing and wall base and covered with washed rock , the floor would have 6" to 8" of washed rock under the concrete floor. The treated wood foundation in general has been a good system.
